PEDIATRIC NEUROLOGY
Subject Index Volume 35

ACTH therapy, short-duration, for cryptogenic West syndrome with better outcome, 415
Adrenoleukodystrophy, X-linked, mutational analyses, 250
Alagille syndrome, and pediatric median neuropathy due to pruritis, 216
Alexander disease, and early mitochondrial dysfunction, 293
Amplitude-integrated electroencephalography pattern and voltage in asphyxiated term infants, 335
Anemia, iron deficiency, breath-holding, and parental attitude of mothers, 18
Angioma, large venous, due to decreased cortical excitability, 433
Anti-GT1a IgG antibodies in a child with severe Guillain-Barré syndrome, 277
Antiepileptic drugs, plasma levels of in children on the ketogenic diet, 6
Antiepileptic drugs, and adverse effects on bone mineral density, 177
Antioxidant/oxidant status, total, in meningism and meningitis, 382
Aromatic L-amino acid decarboxylase deficiency, 142
Artery fenestration, basilar, and brainstem infarction, causality, 436
Asphyxia, acute near-total intrauterine, and early continuous video-EEG, 52
Asphyxiated term infants, and predictive value of amplitude-integrated electroencephalography pattern and voltage, 335
Ataxia-telangiectasia complicated by craniopharyngioma, a new observation, 287
Attention-deficit hyperactivity disorder, recognition of emotional facial expression in, 93
Auditory pitch-perception deficit, carbamazepine-induced transient, 131
Autism
  And HLA-DR4, 303
  And plasma serotonin, 182

Bithalamic lesions of butane encephalopathy, 439
Bone mineral density, and adverse effects of antiepileptic drugs, 177
Book Reviews
  Intellectual disability: understanding its development, causes, classifications, evaluation, and treatment: James C. Harris/author, 232
  Medical care for children and adults with developmental disabilities: I. Leslie Rubin and Allen C. Crocker/editors, 448
  Pediatric neurovascular disease: surgical, endovascular, and medical management: Michael J. Alexander and Robert F. Spetzler/editors, 448
Botulinum toxin type-A in the management of cerebral palsy: low or high dose?, 446
Brachial plexus palsy, obstetrical, and fetal deformations, 246
Brain malformation produced during early development, and enhanced capacity of epilepsy, 38
Brainstem infarction and basilar artery fenestration, causality, 436
Brain structure, abnormal, and cognition, linked in holoprosencephaly, 387
Brain tumor, malignant, idiopathic granulomatous encephalitis mimicking, 280
Breath-holding spells, parental attitude of mothers, and iron deficiency anemia, 18

CACNA12I not associated with childhood absence epilepsy, 187
Carbamazepine-induced transient auditory pitch-perception deficit, 131
Cardiac transplantation, postmortem intracranial neuropathology following, 107
Catecholamine toxicity in aromatic L-amino acid decarboxylase deficiency, 142
Cataplexy leading to the diagnosis of Niemann-Pick disease type C, 82
Central nervous system injury, acute, and cerebral salt wasting syndrome, 261
Cerebral palsy
  Botulinum toxin type-A in management of, low or high dose?, 446
  Can spasticity and dystonia be independently measured in?, 375
  Communicating diagnosis: caregiver satisfaction and stress, 408
Chorea, valproate-induced, and encephalopathy in atypical nonketotic hyperglycinemia, 356
Coenzyme Q_{10} absorption and tolerance in children with Down syndrome: a dose-ranging trial, 30
Cognition and abnormal brain structure linked in holoprosencephaly, 387
Cognitive delay, hereditary hypotonia, muscle weakness, and failure to thrive, 425
Convulsions, complicated early childhood, and six-year follow-up MRI study, 257
Cortical excitability, decreased, due to a large venous angioma, 433
Corticospinal tract involvement in a patient with 3-HMG coenzyme A lyase deficiency, 139
Craniopharyngioma, complicating ataxia-telangiectasia, 287
Cyclic vomiting with generalized epileptiform discharges responsive to topiramate therapy, 348
Cytomegalovirus infection, complicated by isolated abducens nerve palsy, 229

Developmental delay, and value of gadolinium in brain MRI examinations for, 126
Diabetes, and cerebral venous thrombosis as first presentation of, 135
Down syndrome, with coenzyme Q_{10} absorption and tolerance, 30
Dystonia and spasticity, can they be independently measured in cerebral palsy?, 375
Dystrophinopathy, approach to asymptomatic hyperCK-emia, 145

EEG
  Early continuous video, in acute near-total intrauterine asphyxia, 52
  Generalized epileptic, and fixation-off sensitivity, induced by eyes closed, 363
  Pattern and voltage amplitude-integrated, predictive value of in asphyxiated term infants, 335

Electrodiagnostic pattern approach for childhood polyneuropathy, 11
Emergency department admission of children with unprovoked seizure: recurrence within 24 hours, 98
Encephalitis
  Chronic herpes simplex virus, 57
  Idiopathic granulomatous, mimicking malignant brain tumor, 280
  West Nile mimicking herpes encephalitis, 62
Encephalocephalography pattern and voltage, amplitude-integrated, predictive value of in asphyxiated term infants, 335
Encephalopathies, mitochondrial, and treatment with a xanthine oxidase inhibitor, 318
Encephalopathy
  And valproate-induced chorea in atypical nonketotic hyperglycinemia, 356
  Butane, bithalamic lesions in, 439
  Hypertension-induced cerebellar, 162
Encephalopathy, moderate neonatal, teenage outcome after being born at term, 268
Epilepsy
  And systematic review of the use of the ketogenic diet, 1
  Benign rolandic, and quality of life, 240
  Childhood absence, not associated with CACNA1I, 187
  Enhanced capacity of, on brain malformation produced during early development, 38
  Partial
    And 47, XXX karyotype; 69
    Presenting as apneic seizures without posturing, 359
Epileptiform discharges, generalized, and cyclic vomiting, responsive to topiramate therapy, 348
Epstein-Barr virus infection, chronic active, and increased intracranial pressure, 352

Facial expression recognition of emotional, in attention-deficit hyperactivity disorder, 93
Failure to thrive, hereditary hypotonia, muscle weakness and cognitive delay, 425
Fetal deformations: a risk factor for obstetrical brachial plexus palsy, 246
Fixation-off sensitivity and generalized epileptic EEG induced by eyes closed, 363
47,XXX karyotype and partial epilepsy, 69
Fumarate hydratase deficiency in monozygotic twins, 150

Gadolinium, value of in brain MRI examinations for developmental delay, 126
Gamma-glutamyl transpeptidase, elevated neonatal, and maternal lamotrigine treatment, 220
Gene mutation
  Deletion of 17p13 and *LIS1* , in isolated lissencephaly sequence, 42
  MTHFRC677T homozygous, and recurrent stroke, 49
Ginko nut intoxication, 275
Gomez, Manuel Rodriguez, in memoriam, 47
Granulomatous disease, postencephalitic chronic, 297
Guillain-Barré syndrome, severe, and anti-GT1a IgG antibodies, 277

Hallucinations, ictal visual and interictal psychosis, and orbitofrontal seizures, 78
Head growth in infants with infantile spasms may be temporarily reduced, 197
Heart surgery, and restless leg syndrome, 223
Hemiparesis
  Congenital, and neuroimaging abnormalities, 191
  Periodic (paroxysmal), and vanishing white matter disease, 65
Hemorrhagic infarction, periventricular: risk factors and neonatal outcome, 85
Hepatic involvement, not present in Wilson disease, psychological presentations, 284
Herpes simplex virus encephalitis, chronic, 57
HLA-DR4 in families with autism, 303
Holoprosencephaly, and links between abnormal brain structure and cognition, 387
HyerCKemia, asymptomatic, and dystrophinopathy, 145
Hyperglycinemia, atypical nonketotic; and valproate-induced chorea and encephalopathy, 356
Hypotonia, hereditary, muscle weakness, failure to thrive, and cognitive delay, 425

IL-1B production from dsRNA-stimulated leukocytes in febrile seizures, 102
Immunocompetent children, and T-cell lymphoma presenting with neurologic features, 314
Infantile spasms
  And head growth in infants, 197
  Cryptogenic, and short-duration ACTH therapy, 375
Influenza A and febrile seizures, 395
Intoxication, Ginko nut, 275
Intracranial neuropathology, postmortem, following cardiac transplantation, 107
Intracranial pressure, increased, due to chronic active Epstein-Barr virus infection, 352
In utero spinal cord injury, 367
Iron deficiency anemia, breath-holding spells, and parental attitude of mothers, 18

Ketogenic diet,
  Plasma levels of antiepileptic drugs, 6
  Review of its use in childhood epilepsy, 1

Lamotrigine, and localized purpura, 227
Lamotrigine treatment, maternal, and elevated neonatal gamma-glutamyl transpeptidase, 220
Landau-Kleffner syndrome with mitochondrial respiratory chain-complex I deficiency, 158
Leukocytes, dsRNA-stimulated and increased IL-1B production in febrile seizures, 102
Lissencephaly sequence, isolated, and deletion of 17p13 and *LIS1* gene mutation, 42
Lymphoma, T-cell, presenting with neurologic features in immunocompetent children, 314

Median neuropathy, pediatric, due to pruritus in Alagille syndrome, 216
Meningism and meningitis, and total antioxidant/oxidant status, 382
Meningitis and meningism, and total antioxidant/oxidant status, 382
Metabolic crisis, acute, induced by vaccination, 114
Migraine, and activity levels among adolescents, 119
Mitochondrial disease diagnosis, normal muscle respiratory chain enzymes complicating, 289
Mitochondrial encephalomyopathies, treatment with a xanthine oxidase inhibitor, 318
Mitochondrial respiratory chain-complex I deficiency, and Landau-Kleffner syndrome, 150
Mitochondrial dysfunction, early, in an infant with Alexander disease, 293
Moyamoya syndrome with trisomy 12p syndrome, 442
MRI, six-year follow-up study of complicated early childhood convulsions, 257

MRI, brain, value of gadolinium in examination for developmental delay, 126
MRI and glucose PET correlation in congenital perisylvian syndrome, 21
Multiple sclerosis with childhood onset, 327
Muscle respiratory chain enzymes, normal, can complicate mitochondrial disease diagnosis, 289
Muscle weakness, hereditary hypotonia, failure to thrive, and cognitive delay, 425
Mutational analyses of Taiwanese kindred with X-linked adrenoleukodystrophy, 250
Myelitis
  Acute, 430
  Transverse, after therapy for primitive neuroectodermal tumors, 122

Neuroblastoma found after rituximab therapy for opsoclonus-myoclonus, 213
Neurodevelopmental delay, and nonconvulsive status epilepticus, 209
Neuroimaging abnormalities in infants with congenital hemiparesis, 191
Neuromyelitis optica immunoglobulin G, 370
Neuropathy, pediatric median, due to pruritus in Alagille syndrome, 216
Nerve palsy, isolated abducens, complicating cytomegalovirus infection, 229
Niemann-Pick disease type C, and cataplexy, 82

Oligohydrosis and topiramate, 446
Opsoclonus-myoclonus and retuximab therapy, with neuroblastoma following, 213
Oxcarbazepine
  Monotherapy in children and adolescents; a single-center clinical experience, 235
  Therapy in very young children, 173

Parasomnia, adolescent pertussis-induced partial arousal, 264
Parental attitude of mothers, iron deficiency anemia, and breath holding spells, 18
Perisylvian syndrome, congenital: MRI and glucose PET correlations, 21
Pertussis-induced partial arousal parasomnia, adolescent, 264
PET, glucose, and MRI correlations in congenital perisylvian syndrome, 21
PHACE, neurologic aspects, 419
Polyneuropathies, electrodiagnostic pattern approach, 11
Pruritis, and pediatric median neuropathy in Alagille syndrome, 216
Psychological presentations without hepatic involvement in Wilson disease, 284
Psychosis, interictal, and ictal visual hallucinations, with orbitofrontal seizures, 78
Purpura, localized, associated with lamotrigine, 227

Quality of life of children with benign rolandic epilepsy, 240

Radiologic spectrum and deep venous occlusion in Sturge-Weber syndrome, 343
Restless legs syndrome triggered by heart surgery, 223
Rituximab therapy for opsoclonus-myoclonus, and neuroblastoma, 213

Salt wasting syndrome, cerebral, in children with acute central nervous system injury, 261
Seizures
  Apneic, without posturing, and partial epilepsy, 359
  Complicated early childhood, and six-year follow-up MRI study, 257
  Febrile
    And influenza A, 395
    And increased IL-1B production from dsRNA-stimulated leukocytes, 102
    Role of viral infections in etiology, 165
  Intractable, and vagus nerve stimulation, 323
  Myoclonic, in Krabbe disease: a unique presentation in late-onset type, 154
  Orbitofrontal, with ictal visual hallucinations and interictal psychosis, 78
  Unprovoked, and emergency department admission, 98
Sepiapterin reductase deficiency: clinical presentation and evaluation of long-term therapy, 308
Serotonin, plasma, in autism, 182
Slow-wave sleep, continuous spike and wave in, and sulthiame therapy, 204
Spasticity
  And dystonia, can they be independently measured in cerebral palsy, 375
  Prematurity-related, and evaluation of a multimodal management, 400
Spike and wave, continuous, in slow-wave sleep, and sulthiame therapy, 204
Spinal cord injury that occurred in utero, 367
Status epilepticus, nonconvulsive, and neurodevelopmental delay, 209
Stroke
  Perinatal, in twins without co-twin demise, 75
  Recurrent, and homozygous MTHFR C677T gene mutation, 49
Sturge-Weber syndrome: deep venous occlusion and the radiologic spectrum, 343
Sulthiame therapy for continuous spike and wave in slow-wave sleep, 204

T-cell lymphoma presenting with neurologic features in immunocompetent children, 314
3-HMG Coenzyme A lyase deficiency, and corticospinal tract involvement, 129
Thrombosis, cerebral venous, as a first presentation of diabetes, 135
Topiramate
  And oligohydrosis, 446
  Therapy as treatment for cyclic vomiting with generalized epileptiform discharges, 348
Transplantation, cardiac, and postmortem intracranial neuropathy, 107
Trisomy 12p syndrome, and moyamoya syndrome, 442
Tumors, primitive neuroectodermal, and transverse myelitis, 122
Twins, monozygotic, and fumarate hydratase deficiency, 150

Vaccination and acute metabolic crisis, 114
Vagus nerve stimulation for intractable seizures, 323
Valproate-induced chorea and encephalopathy in atypical nonketotic hyperglycinemia, 356
Vanishing white matter disease with periodic (paroxysmal) hemiparesis, 65
Venous occlusion, deep, and radiologic spectrum, in Sturge-Weber syndrome, 343
Venous thrombosis, cerebral, as a first presentation of diabetes, 135

Viral infections in the etiology of febrile seizures, 165
Vomiting, cyclic, with generalized epileptiform discharges responsive to topiramate therapy, 348

West syndrome
And head growth, 197
Cryptogenic, and short-duration ACTH therapy, 408
West Nile encephalitis mimicking herpes encephalitis, 62
White matter disease, vanishing, with periodic (paroxysmal) hemiparesis, 65
Wilson disease, and psychological presentation without hepatic involvement, 284

Xanthine oxidase inhibitor, as treatment for mitochondrial encephalomyopathies, 318
X-linked adrenoleukodystrophy, mutational analyses, 250
